- PostgreSQL
- Jenkins
- RabbitMQ
- Kubernetes
- Docker
- AWS / GCP

EDUCATION

2012 - 2016
RYDALPARK SECONDARY

- High school diploma

HOBBIES

- Football
- Watching Netflix
- Coding
- Watching history documentaries
- Learning about space

PROFILE SUMMARY

I'm a 25 year old self-taught developer, which means I don't have a formal degree and I am getting old. After finishing high school, I started working for my dad—I had worked for him before, but that was more like child labor. In 2021, I began watching coding tutorials on YouTube. Before I knew it, I went from creating UIs using HTML and CSS to building APIs and getting hired. Now, I'm approaching two years in the tech industry, and I can't wait to see what the future holds for me.

WORK EXPERIENCE

El Shaddai Interiors   2017 - 2022
Carpenter

I started working for my dad after finishing high school, where we specialized in making custom cabinets and kitchen cupboards.

Responsibilities:
- Checked the quality of materials before use.
- Performed daily inventory checks.
- Assembled cabinets using high-quality materials.
- Applied finishing touches to cabinets before presenting them to clients.
- Created cutting lists needed for each cabinet.

Decidio   2023 - PRESENT
Software Developer

This was my first tech job.

Responsibilities:
- Initially provided support for the Truendo product.
- Identified and fixed bugs.
- Implemented new features.
- Assisted in developer operations.
- Created standard operating procedures.

Key Achievements:
- Developed consent record upload functionality, transferring data from a PostgreSQL database to Amazon S3.
- Implemented a geo feature to serve different scripts and configurations based on activated geographic regions.
- Created various general-purpose APIs.
