Durban, KwaZulu-Natal

ABOUT

Hey, I'm Marco — 26 years old, big football fan, and a proud Liverpool supporter. I love going on holidays by myself, just exploring and enjoying my own company. I'm a Christian and a God-fearing person, which keeps me grounded. I'm definitely a night owl, and there's nothing better than a long solo drive to clear my head. I've got surfing on my list next — can't wait to catch some waves soon.

I'm a Self-taught full-stack developer with 2.5+ years of experience building web applications. I worked as a support agent for less than a month before transitioning into a full-stack development role. I work across both frontend and backend technologies, with occasional DevOps work when needed. I'm passionate about learning new technologies and love diving into different parts of an application to understand how everything connects together.
